Untangle the Whale

MIA'S MISSION

Trace the five illustrated lines.
Circle the one line that releases the knot at the whale's tail in this drawing.

Paper puzzle only. If you see an entangled whale, stay back and tell an adult to report it to trained responders.

OCEAN FACT

New pop-up crab traps can reduce the risk of whale entanglement by keeping vertical ropes out of the water column until the traps are retrieved. Learn more in Mia Kingtide Book 2.
